PROFESSIONAL SUMMARY

Full stack developer with proven experience building web applications and data platforms using React.js, Node.js and Express.js. Skilled in developing secure REST APIs, automated data pipelines, real-time dashboards and RBAC admin platforms. Adept at designing reusable components, integrating APIs, optimizing performance, and collaborating with clients and product teams to deliver impactful solutions.

WORK EXPERIENCE

Full Stack Developer (MERN) — Pakistan Agriculture Research

Karachi, Pakistan · Jun 2024 – Present

- Led and built a role-based access system from scratch with four levels (user, admin, super_admin, administrator) to control data access across the platform.
- Implemented secure JWT authentication using httpOnly cookies and Redis to manage session invalidation.
- Developed and integrated RESTful APIs and optimized backend queries, improving response time by 40%.
- Built reusable React UI components and converted Figma designs into responsive, accessible UIs, reducing development time by 30%.
- Conduct product demos, gather requirements, and collaborate with product and design teams.
- Implemented CI/CD pipelines using GitHub Actions and VPS deployment, reducing release cycle time.
- Maintained Git workflows and participated in peer code reviews, reducing deployment issues by 50%.

PROJECTS

PAR Agri Data Dashboard (Jun 2024 – Present)

- Built backend APIs for dynamic filtering of data queries and role-based content using Node.js and MongoDB.
- Revamped the landing page with a modern React UI, increasing organic traffic by 40%.
- Integrated Mixpanel for behavioral analytics and ApexCharts for real-time market data visualizations.

PAR Admin Panel (Jun 2024 – Present)

- Developed an RBAC admin panel to manage data and operations, improving team efficiency by 50%.
- Designed and integrated secure APIs for data management using MongoDB and Node.js/Express.js.
- Automated data collection using Python scrapers and node-cron, eliminating manual entry.

PAR News Bulletin Automation (Jan 2026 – Feb 2026)

- Built an automated news pipeline collecting articles from multiple sources and summarizing key facts.
- Condensed content by 60–70% into publication-ready bulletins with consistent formatting and metadata.
- Integrated Amazon SES for scheduled, automated delivery while ensuring editorial accuracy.

SKILLS

Frontend: JavaScript, TypeScript, React.js (Next.js), Redux, Context API, HTML5, CSS3, Bootstrap, MUI, ShadCN, Tailwind CSS

Backend & Databases: Node.js, Express.js, RESTful APIs, MongoDB, MySQL, Redis Caching

Testing & Quality: Jest, ESLint, Prettier

Version Control & Tools: Git & GitHub, Postman, CI/CD (GitHub Actions, VPS Deployment), GCP, AWS

AI-Assisted Tools: Codex, Claude Code, GitHub Copilot, ChatGPT, Cursor, Windsurf

Soft Skills: Client Communication, Problem-Solving, Teamwork, Requirement Gathering

EDUCATION

Bachelor of Science, Computer Science — DHA Suffa University

Karachi, Pakistan · Sep 2019 – Feb 2024
